

# Google BigQuery for Big Data Analytics Software Installation

If you have any problems with the registration process below, please email me at: [victor.tan.33@gmail.com](mailto:victor.tan.33@gmail.com)

A short video [outlining the process is available here](#).

You will need a standard Google account (which comes with your GMail address, if you have one) in order to access the Google BigQuery facility. This can either be your private Google account or your company account.

If you don't have a Google account or GMail address, you can create one following the instructions below.

<https://support.google.com/accounts/answer/27441?hl=en>

<https://support.google.com/mail/answer/56256?hl=en>

You can either access BigQuery for free using [either the BigQuery Sandbox](#) (which does not require a credit card registration) or the GCP Free Trial (which requires a credit card registration).

To access the Big Query Sandbox, you can navigate directly to the [Big Query console home page](#).

There are some limitations associated with the [use of the Big Query sandbox](#).

Alternatively, if you wish to access the GCP free trial that requires a credit card registration as well, you can register for Big Query [at this link](#).
